

# Make working for The City work for you.

## Senior Transportation Engineer

If you are committed to public service, enjoy collaborating with others, share our values and have a desire to learn and grow, join The City of Calgary. As a Senior Transportation Engineer, you will deliver quality infrastructure projects, shaping the way the City builds, and affecting citizen's daily lives. We support work-life balance, personal development and training, and offer competitive wages, pensions, and benefits. Together we make Calgary a great place to make a living, a great place to make a life.

Transportation Infrastructure is seeking highly skilled and motivated individuals who aspire to work on exciting projects in a fast paced environment. In this role, you will have hands-on involvement in managing multi-faceted transportation projects such as the [Green Line Light Rail Transit](#) (LRT), the [Southwest Ring Road](#) connections, and the [Bus Rapid Transit Program](#) through the concept, design, and construction phases. Primary duties include:

- Develop project implementation plans for capital projects up to \$200 million.
- Work with consultants and contractors to ensure that targets are met, and projects are delivered on schedule, on budget, and meet quality standards.
- Manage construction contracts and operations, ensuring effective teamwork, communication, high standards of work quality, organizational performance, and continuous learning.
- Analyze project risks and market conditions, review available procurement alternatives, recommend contractor and consultant selection methods, prepare documents, and assist in selection.
- Liaise with internal City departments, regulatory agencies, consultants, and contractors to establish coordination of designs and construction acceptance with other City business units.
- Communicate effectively with members of the public and other external stakeholders.
- Coach, mentor, and provide oversight to junior team members.
- Research and prepare reports for Committee and Council.
- Present to stakeholders at open houses, committee meetings and Council meetings.

### Qualifications

- A degree in Civil Engineering or a related Engineering field, registration as a Professional Engineer in Canada, and current licensure as a Professional Engineer with the Association of Professional Engineers and Geoscientists of Alberta (APEGA) or licensure by the first day of work.
- A minimum of 4 years of post-professional engineering designation experience, including considerable hands-on experience with municipal infrastructure projects.
- A thorough understanding of civil design and construction.
- Previous experience with ISO 14001 and environmental guidelines.
- Well developed communication, organization, and leadership skills; a high attention to detail, political sensitivity, and a strong customer focus.
- Excellent project management skills and the ability to work effectively with stakeholders.

### Pre-employment Requirements

- Successful applicants must provide proof of qualifications.
