Note: the governing legislation in the Yukon requires that all partnerships, corporations, and other such entities, including sole proprietors, who practice the profession of engineering, obtain a Permit to Practice. Therefore, please note if you are practicing engineering on behalf of a company, the company is considered to be practicing and must have a Permit to Practice. Also, the *Engineering Professions Act* does not differentiate between size of an organization or whether the organization is practicing for internal or external reasons. It is straightforward; if you are practicing engineering, you require a Permit to Practice.
